Summary

Front End Engineer and Software Engineer with a focus on creating responsive and highly interactive web/mobile applications. I am well versed in best practices for front end development using JavaScript (React, Vanilla) and Mobile Development (React Native) and User Interaction. I have built frontend projects that aim at changing the world.

Technical Proficiencies

JavaScript	ReactJS	NextJS	React Native
HTML	CSS	Git	Tailwind
Bootstrap			

Skills

Front End Engineer | User Interaction

- Architect robust web applications in HTML5, CSS3, ES 6+.

- Developing code standards and best practices for JavaScript, HTML, and CSS and guidelines for using emerging JavaScript technologies.

- Develop a set of standards for UI/UX designs by creating a company design system with a focus on increasing engagement and conversions. Perform UX audits to identify potential gaps in user flows.

Software Engineer | UI/UX Design

- Create and maintain user flow diagrams, documentation, and code standards.
- Facilitate group code reviews and retrospective discussions.

IT Assistant

- Create responsive websites that are user friendly on mobile devices and desktops using the mobile first methodology.
- Maintain and improve websites using WordPress, HTML5, and CSS3.
- Integrate web analytics and provide feedback to help increase clarity of tracking.
- IT help desk support.
- IT hardware and software installation.
- LAN and WAN management.

Education

B.Sc. Mathematics and Computer Science   **2020 – to date**
